- To enhance the safety, security and protection of our products and services

WE HANDLE INSTALLATIONS

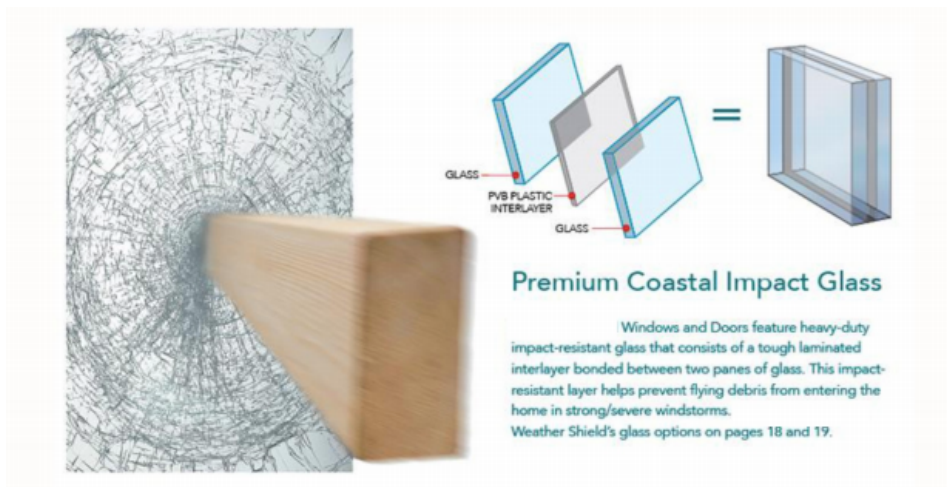

Installation provided by Professional Certified Installers

PRODUCT SPECIFICATION & WARRANTY

This is to advise that, unless otherwise indicated, all of our hurricane impact doors and windows are specified as below. These products are designed to withstand normal impacts associated with up to categories 3, 4, and 5 hurricanes so that you may have peace and safety during the storm.

GLASS

This product consist of a double impact laminated glass with a plastic film between each glass. The total thickness of the glass is 12mm; each glass being 6mm thick. the plastic film between each glass is .76mm thick. Tint and design of glass are as per customer request. The glass is tempered under intensified heat in order to strengthen it and is attached to the frame using silicone sealant. In other words, our quality glass is first laminated and tempered and then forms a double pane glass that is binded together by a strong layer of plastic film which also reduces heat up to 65%. We call this concept double impact to resist hurricane force winds.

Laminated glass is a type of safety glass that holds together when shattered. In the event of breaking, it is held in place by an inter-layer, typically of polyvinyl butyral (PVB) or ethylene– vinyl acetate (EVA), between its two or more layers of glass.

Our glass is certified by the International Organization for Standardization (IOS).

FRAMES

Window and door frames are 88mm thick and is made of polyvinyl chloride (PVC), which is best suitable for our climate. Steel is inserted into frame to strengthen and support the window upon impact.

MECHANISMS

This product is fitted with stainless steel non-rust mechanisms.

When purchasing our impact windows and doors; rest assured that we are committed to increasing the safety, security and protection of all homes and businesses. Our products offer:

- Easy Installation
- Wonderful performance and resilience
- Sound proof and heat insulation

ADVANTAGES OF UPVC CASEMENT WINDOWS

- Waterproof
- Long-time durability
- Air inflation
- Sound and heat insulation
- Wonderful performance
- Easy installation and maintenance
- Structural Integrity
- Strong corrosion resistance
- Replacing wood with plastic to protect ecological balance

GENERAL FEATURES OF UPVC CASEMENT WINDOWS

A UPVC casement window profile is 60mm thick, and can open wider than a sliding window. It is:

- Elegant and easy to clean and maintain
- Suitable for many architectural designs
- Gives allowance for the direction of breeze to any part of your home

CASEMENT WINDOW

CASEMENT WINDOW

SINGLE CASEMENT WINDOWS

These window designs:

- Swing open like a door
- Offers a friction hinge located on the side of the window which protects the window during a storm

SINGLE CASEMENT WINDOW

DOUBLE CASEMENT WINDOWS

Our window designs:

- Open from the middle
- Has a centre profile in the middle that makes the window stronger

DOUBLE CASEMENT WINDOW

SLIDING WINDOW

The UPVC sliding window:

- 'Slides' smoothly by way of a screen track located in the frame of the window
- Has an anti-collision block which helps to protect the window frame from attack
- Is 88mm thick with brush seals along the whole length of the sash profile to prevent rain water infiltration
- Has an extra drainage hole to allow the water to go out during a storm
- Has a centre profile in the middle that makes the window stronger

SLIDING WINDOW

SLIDING WINDOW

ALUMINUM HUNG WINDOWS

These windows are available featuring bottom slide, top fixed or both top and bottom slide. Note the following design features:

- A double glass can be used
- The glass can not be laminated.
- The hung window profile is 1.5mm thick.

ALUMINUM HUNG WINDOWS

ALUMINUM SLIDING WINDOW

These windows have no need to open inside or to the outside:

- It slides smoothly along the screen track, and the anti-collision block protects the window frame from attacks
- It contains brush seals which are used in sash profiles along the whole length of the window to protect the inside from rain.
- It has a thick profile of 70mm
- It can be normal or thermal break

ALUMINUM SLIDING WINDOW

ALUMINUM CASEMENT DOORS

Only one side of the casement door can open; just like a single swing window. Most notably:

- It is an elegant entry door
- The design can be made with sidelights which is famous in America Yard Door
- An up and down bolt is used for good security
- It has a 50mm thick profile (2.0mm wall thickness).

ALUMINUM SLIDING DOOR

These doors have the same specifications as the sliding window:

- Depending on the size of the sliding door, the profile can be 130mm/ 200mm thick
- It is available with 2, 3, 4, or 5 tracks and a number of configurations to suit the customer's request
- The locks can be flush or D-shaped, and can be purchased with or without a screen track.

ALUMINUM CASEMENT DOORS

ALUMINUM SLIDING WINDOW

Aluminum Doors can open:

- to the outside
- to one side with a wide vision
- from the middle

The profile of the aluminum folding door can be 75mm/ 68mm thick (depending on the size of the door).

ALUMINUM FOLDING DOORS

LOCKS

Aluminum Bullet Proof Windows and Doors can be casement, sliding, or folding. The glass is bulletproof. The specifications of the aluminum bulletproof windows and doors is the same as the aluminum windows and doors.

FEATURES:

- Triple 6mm or 8mm tempered glass with two special strong films called PVB (polyvinyl butyral) inside
- Holds together when shattered
- It is good protection and resist hurricane force winds
- The glass can be made available in various colors including clear, tinted grey, brown, blue and green

PORCELAIN TILES

Our store carries sizes 24 " x 24" and 24" x 48" porcelain tiles.

Note that:

- These tiles are incredibly strong and hard especially when compared to ceramics
- They can handle heavy traffic, making them ideal for business places
- They are less absorbent than other types of floors making them stain resistant against spills from drinks, food, or chemicals

MOSAIC TILES

Make your space stand out with Mosaic!

Mosaic tiles adds contemporary elegance to kitchens, tub, backsplashes, shower surrounds as well as many more applications.

They can also be cut to make borders, accents, and inserts.
